# BI-IOŠ

Lukáš Hromadník, Jakub Olejník, Igor Rosocha

# Lecture 11 - Push notifications

# Push notifications

APNS key

Code signing

Push notifications, Notification Service Extension

iMessage extension

SwiftUI <-> UIKit interfacing

# APNS key

Apple Push Notification service

enables third party application developers to send notification data to applications installed on Apple devices

⚠️ .p8 file, created and downloaded only once

# Code signing

- ❑ Automatically manage signing (suitable for development)
- ❑ Manually manage signing (required for CI/production builds)

# Code signing

**Certificates** - sign the binary of applications, two types — development and distribution

**Provisioning Profiles** - acts as a link between the device and the developer account using certificate

Let's code! 

# Questions?

Thank you very much,  
see you next week! 🙌🙌
